

Start taking card payments

Connect Fangate to SofiPanel in three steps.

Your fans get one link. They pay with Stars, Cherrys, or a card.

WHAT CHANGES

Cards, next to what you already sell

- Fans can pay by card. Stars and Cherrys keep working exactly as before.
- You open your own Fangate account, and Fangate pays your card earnings out to you.
- SofiPanel takes nothing from a card sale.

Nothing you already do changes. The card is one more button on the same offer.

Connect your Fangate account

- Click Create your Fangate account and sign up. Their identity check is immediate.
- On Fangate, generate an API key with all three permissions switched on.
- Paste the key back into SofiPanel. It is shown only once, so copy it first.

FANGATE — PAYMENT GATEWAY

Sell through Fangate as a second checkout, alongside your current one. Connecting it changes nothing about how you sell today — your chatters simply get one more way for fans to pay: a card button on the same offer.

 [Create your Fangate account](#)

Already have one? [Open Fangate](#)

Then complete their identity verification, generate an API key and paste it below. Switch on **Manage content and sales links**, **View revenue and transactions** and **Manage webhooks** — a key without them connects but cannot sell. The key is shown only once, so copy it before closing their dialog.

Upload your content as usual

- Upload to your Vault exactly as you do today. There is no second library to manage.
- Answer once what the content is. A wrong answer is the usual reason a file gets blocked.
- It syncs to Fangate by itself. A badge appears only when a file needs your attention.

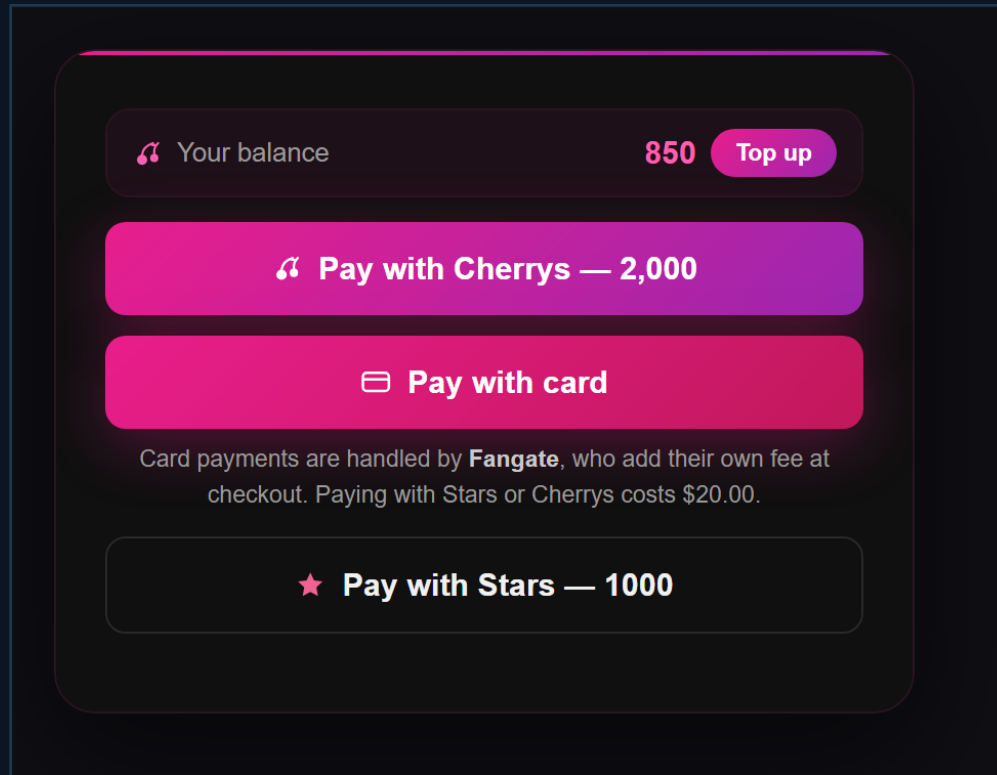

Send an offer with a card option

- Set your price. Card needs at least \$5, which is Fangate's minimum.
- Under Payment methods pick Both, Card, or Stars. Cherrys are always included.
- Send. Your fan gets one link with every option you allowed.

Payment methods Cherrys always work

One link, every way to pay

- Same content and same price, whichever button they pick.
- The card button takes them to Fangate, which adds its own fee there.

Where card sales show up

- Fangate's balance on top, and under it the card sales sent from SofiPanel.
- Stars and Cherrys stay in your usual SofiPanel Revenue, exactly as before.

\$1,284.50

AVAILABLE

\$96.00

PENDING

\$0.00

ON HOLD

\$1,380.50

TOTAL

These are Fangate's numbers, from your Fangate account. Payouts happen there under their terms, and none of it appears in your SofiPanel revenue or withdrawals — card sales are settled entirely on their side.

CARD SALES SENT FROM SOFIPANEL

Today

7d

30d

Month

All

\$181.99

FROM 3 SALES

↑ +52%

The amount is the price you set in the offer. Fans pay Fangate's fee on top of it, and what actually lands in your balance is settled by Fangate above.

PAID	FAN	SENT BY	AMOUNT
2026-09-16 21:14	Marta	Denis	\$42.00
2026-09-16 18:02	Fan #778201325		\$19.99

What happens on its own

- Your fan gets access the moment the payment goes through.
- You get the usual payment alert, and it says Card (Fangate).
- The other payment option closes, so nobody pays twice for the same thing.

You do not have to do anything after a card payment.

Four things worth remembering

- Fangate adds its own fee at their checkout. Your price goes to them unchanged.
- Card needs at least \$5. Stars and Cherrys work at any price.
- Delete a file here and it is deleted there too. Any unpaid offer with it closes.
- You can disconnect at any time. Your Stars and Cherrys offers keep running.

That is the whole setup.

One connection, and then you sell the way you always have - with one more way for fans to pay.
